Indonesia shows potential demand as an emerging market.

Opportunities

+14% <i>Deloitte, 2020</i>	Increase in demand for food delivery fuelled by COVID-19 pandemic outbreak
-70% <i>WE Forum, 2020</i>	Government's ambition for plastic pollution reduction target by 2025
75% <i>McKinsey, 2021</i>	Indonesians' emerging willingness to pay for green & biodegradable products

Opportunity to venture into eco-friendly packaging

Strengths

Strong sustainability branding	Products are certified to be 100% eco-friendly and biodegradable
Innovative biodegradable technology	Robust partnerships with research institutes and Experimental Factory Magdeburg, ZIM

Weaknesses & Threat

High selling price		<i>Comparing selling prices</i>		
Lack of product differentiation		InCare Asia cup Rp 2.400	Evoware Jello cup Rp 2.000	Plastic cup Rp 160
				

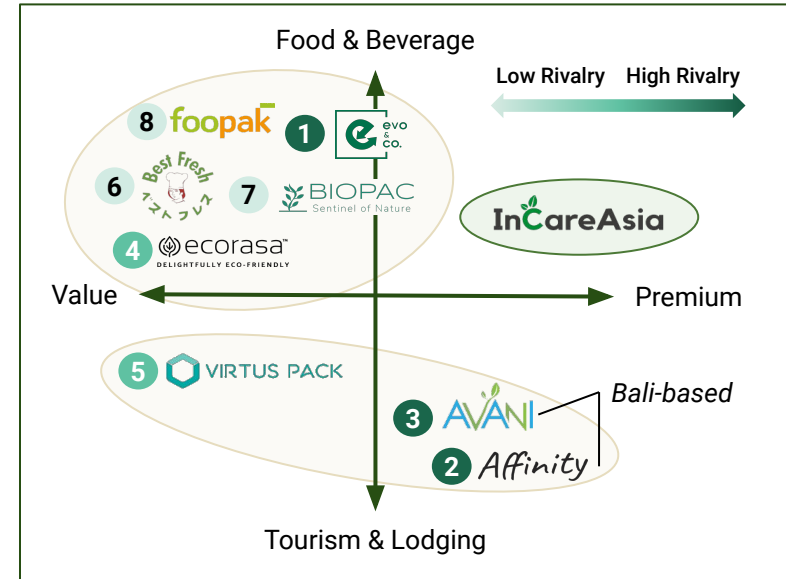

Weaknesses necessitate **service differentiation** due to **threat of new entrants** due to **low barriers of entry**.

Country Analysis

P <i>World Bank, 2020</i>	Digitalization improving corruption and bureaucratic inefficiency
E <i>Trading Econ., 2020</i>	Positive bounce-back trajectory with increasing GDP since 2020
S <i>Statista, 2019</i>	Onset of social media promotes environmental issue awareness
T <i>Statista, 2021</i>	Mobile-first nation with high smartphone usage & internet access

The industry is very fragmented, with many firms but no clear market leader.

Bargaining Power		External Threats	
Customer	Supplier	New entrants	Substitutes
High switching costs for food packaging	Availability of multiple raw material suppliers	Low startup cost for local players due to prevalent raw materials & opportunities for economies of scale	Bioplastic (PLA) as a cheaper substitute
Lack of urgency to switch to eco products	Manufacturing partner has leverage in production costs	Various affordable yet non-eco-friendly packaging	

There is **moderate industry rivalry** as firms have not established footing, but the wide presence of cheaper alternatives may be a threat.

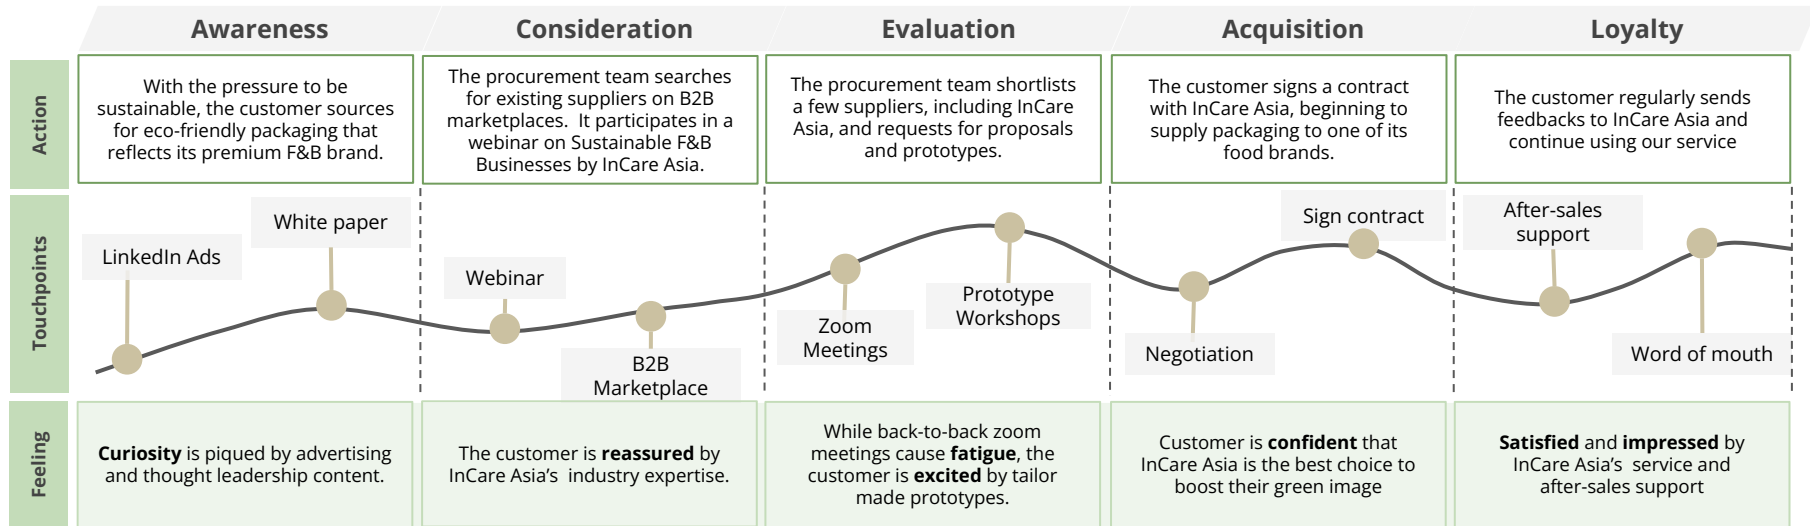

Positioning InCare Asia as a **Premium-F&B** supplier would allow a greater **market share projection of 20%**.

"Green" image is a valuable point of differentiation for a premium market.

Customer's Profile
Premium F&B brands
Sustainable companies
High-income end users

Key Purchasing Factors
Premium look & feel
Durable & high-quality materials
End-to-end customization service that reflects customer's premium branding

Product	Custom eco-friendly biodegradable F&B packaging
Price	Premium Rp 2,400 - 6,000
Place	Online B2B marketplace, company website
Promo	LinkedIn, webinars, expos, trade fairs

5-Year Implementation Timeline

		2022		2023		2024		2025		2026	
Channel	Build partnership with manufacturing plants										
	Build partnerships with large F&B groups (Ismaya, Boga, etc.)										
	Establish stores in B2B marketplace (GudangAda, Bhinneka)										
Strategy	Design customization and additional variety of material										
	Venture to other product lines (e.g. beauty & personal care)										
	Promotions and discounts for bulk purchases										
Audience	Gain brand awareness (hosting events/webinars)										
	Expand to areas with developing infrastructure (Kalimantan)										

Acquiring a sizable
customer base in Java
and Bali

Increase production
to achieve economies
of scale
